DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-129 and 185-250, drawn to Vehicle Rear View Mirrors with Illuminations Means, classified in class 362, subclass 494.
- II. Claims 130-184, drawn to LED Illumination Module, classified in class 362, subclass 488.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed rear view mirror could function with any other of the plurality of different light sources known in the art. The subcombination has separate utility such as providing general illumination, in or outside the vehicle illumination field.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
